

SPONSORED ADVERTISING CONTENT

7 Reasons Scalp Care Is Becoming the New Skincare — And Why Copper Peptides Are Getting So Much Attention

Most hair routines focus almost entirely on the hair you can see. Crowned® takes a different approach: start with the scalp — using a lightweight daily serum featuring Copper Tripeptide-1 (GHK-Cu), Niacinamide, Panthenol and Biotin.

Think about the average hair-care routine.

Shampoo.

Conditioner.

Hair mask.

Styling cream.

Heat protectant.

Oil.

Maybe a leave-in treatment.

Almost everything goes on the **hair you can already see.**

But here's the interesting part:

**EVERY SINGLE STRAND STARTS
SOMEWHERE ELSE.**

YOUR SCALP.

And while people have become incredibly sophisticated about caring for the skin on their face...

Cleansers.

Serums.

Peptides.

Niacinamide.

Barrier support.

Moisturizers.

...scalp care has often remained surprisingly basic.

Shampoo.

Rinse.

Done.

That's beginning to change.

The same type of thinking that transformed skincare — **targeted ingredients, lightweight serums, barrier-focused care and peptides** — is increasingly influencing how people think about their scalp.

And that's exactly the philosophy behind:

CROWNED®

A lightweight, leave-in daily scalp serum featuring:

Copper Tripeptide-1 (GHK-Cu)

Niacinamide

Panthenol

Biotin

Instead of asking you to rebuild your entire hair routine, Crowned adds one targeted step:

APPLY DIRECTLY TO THE SCALP.

MESSAGE.

LEAVE IT IN.

That's it.

Here are 7 reasons this scalp-first approach deserves a closer look.

[SEE TODAY'S CROWNED OFFER →]

Free U.S. Shipping • 90-Day Money-Back Guarantee • No Subscription Required

REASON #1

01. MOST HAIR ROUTINES START TOO FAR FROM THE SOURCE

Think about where most hair products are applied.

Conditioner?

Lengths and ends.

Hair mask?

Lengths and ends.

Oil?

Usually lengths and ends.

Styling products?

The visible hair fiber.

There's nothing wrong with that.

The hair fiber needs care too.

But it leaves an obvious question:

WHAT ABOUT THE SCALP?

Your scalp is skin.

And just like the skin on your face, it has its own barrier, moisture balance and cosmetic condition.

So a complete hair-care routine doesn't necessarily have to stop with shampoo and conditioner.

That's where Crowned changes the conversation.

Instead of focusing exclusively on the visible strand, Crowned is applied **directly to the scalp**.

Its job isn't to replace your shampoo.

Or conditioner.

Or styling products.

It's to add something many routines are missing:

TARGETED DAILY SCALP CARE.

Think of it as the difference between washing your face...

...and actually having a skincare routine.

YOUR HAIR ROUTINE HAS A FOUNDATION.

START THERE.

[DISCOVER CROWNED →]

REASON #2

02. SCALP CARE IS STARTING TO LOOK A LOT MORE LIKE SKINCARE

Ten years ago, the average skincare routine was much simpler.

Today?

Consumers know ingredients by name.

Retinol.

Hyaluronic acid.

Niacinamide.

Ceramides.

Peptides.

People learned that different ingredients can play different cosmetic roles.

Now that same ingredient-conscious mindset is moving upward.

TO THE SCALP.

And Crowned fits perfectly into that evolution.

Instead of another generic hair oil, its formula features ingredients familiar from sophisticated cosmetic formulations.

COPPER TRIPEPTIDE-1.

NIACINAMIDE.

PANTHENOL.

BIOTIN.

All delivered in a lightweight serum designed specifically for direct scalp application.

The idea is surprisingly simple:

IF YOU'RE WILLING TO USE A SERUM ON YOUR FACE EVERY DAY...

WHY SHOULD YOUR SCALP CARE STOP AT SHAMPOO?

Crowned brings a skincare mentality to hair care.

[UPGRADE MY SCALP ROUTINE →]

REASON #3

03. COPPER TRIPEPTIDE-1 MAKES THIS MUCH MORE INTERESTING THAN ANOTHER “BIOTIN SERUM”

This is where Crowned starts to separate itself from the typical hair-care aisle.

COPPER TRIPEPTIDE-1.

Also known as:

GHK-Cu.

GHK-Cu is a copper-binding peptide that has attracted attention in cosmetic science and has been studied in relation to skin biology, tissue remodeling and hair-follicle biology.

But let's make an important distinction.

THAT DOES NOT MEAN:

“GHK-Cu automatically regrows hair.”

And it certainly doesn't mean every cosmetic containing it has been clinically proven to reverse hair loss.

That's not the claim Crowned needs to make.

The more interesting point is this:

PEPTIDE TECHNOLOGY HAS MOVED BEYOND THE FACE.

Crowned brings Copper Tripeptide-1 into a daily scalp-care formula alongside other familiar cosmetic ingredients.

That makes it fundamentally different from formulas built around nothing more than:

“Biotin!”

“Castor oil!”

“Another herbal blend!”

GHK-Cu gives Crowned a more sophisticated formulation story.

NOT ANOTHER GENERIC HAIR OIL.

A PEPTIDE-BASED SCALP SERUM.

[SEE THE CROWNED FORMULA →]

REASON #4

04. THE FORMULA DOESN'T ASK ONE INGREDIENT TO DO EVERYTHING

One of the easiest marketing tricks in beauty is finding one trending ingredient...

...and making it the entire story.

Crowned takes a broader approach.

Its core ingredients have **different cosmetic roles**.

COPPER TRIPEPTIDE-1 — GHK-Cu

THE PEPTIDE COMPONENT

A copper-binding peptide used in advanced cosmetic formulations and researched in areas involving skin and hair-related biology.

ITS ROLE IN CROWNED:

To anchor the product's peptide-based scalp-care positioning.

NIACINAMIDE — VITAMIN B3

THE SCALP-CARE COMPONENT

Niacinamide is already one of the most recognizable ingredients in modern skincare.

It is widely used in cosmetic formulations designed around skin condition and barrier support.

ITS ROLE IN CROWNED:

To complement a well-conditioned, healthier-looking scalp environment.

Not to make an unsupported “hair regrowth” claim.

PANTHENOL — PROVITAMIN B5

THE CONDITIONING COMPONENT

Panthenol is widely used in hair-care formulations because of its conditioning and moisture-related properties.

ITS ROLE IN CROWNED:

To help support softer, smoother and more resilient-looking hair.

BIOTIN — VITAMIN B7

THE FAMILIAR HAIR-CARE COMPONENT

Biotin is one of the most recognizable ingredients in the hair-care category.

ITS ROLE IN CROWNED:

To complement the overall cosmetic hair-care profile.

FOUR INGREDIENTS.

DIFFERENT ROLES.

ONE FOCUSED SERUM.

That's a much more compelling formula story than simply putting one trendy ingredient on the front of a bottle.

[VIEW THE CROWNED INGREDIENTS →]

REASON #5

05. IT'S A SERUM — NOT ANOTHER HEAVY HAIR OIL

There is one reason many scalp routines get abandoned quickly:

GREASE.

You apply the product.

Your roots look heavy.

Your hairstyle changes.

Suddenly something that was supposed to improve your routine becomes something you have to plan around.

Crowned was designed differently.

It's a:

LIGHTWEIGHT

LEAVE-IN

DIRECT-TO-SCALP SERUM

No heavy oil ritual.

No need to coat the entire length of the hair.

No rinse required.

No need to schedule your entire hair-washing routine around the product.

Apply it directly where it's intended to go.

Massage.

Leave it in.

Continue with your day.

SCALP CARE SHOULDN'T MAKE YOUR HAIR ROUTINE HARDER.

[TRY THE LIGHTWEIGHT APPROACH →]

REASON #6

06. IT TAKES ABOUT 10 SECONDS TO ADD TO THE ROUTINE YOU ALREADY HAVE

Here's where many beauty routines fail.

Not because the products are necessarily bad.

Because they're annoying.

Use this twice a week.

That one every third wash.

Leave another treatment on for 45 minutes.

Wash this one out.

Apply that one only at night.

Eventually...

THE ROUTINE BECOMES THE PROBLEM.

Crowned was designed to eliminate that friction.

According to the product directions:

APPLY ONE FULL DROPPER DAILY.

Directly to a dry or towel-dried scalp.

MASSAGE GENTLY.

Focus on the scalp areas where you want to maintain your care routine.

LEAVE IT IN.

No rinse.

Continue with your normal routine.

That's it.

APPLY.

MASSAGE.

GO.

No new shampoo required.

No new conditioner required.

No five-product system required.

Just one focused step.

[MAKE CROWNED PART OF MY ROUTINE →]

REASON #7

07. YOU GET 90 DAYS TO DECIDE WHETHER IT DESERVES A PLACE IN YOUR ROUTINE

Hair and scalp care is not a one-application category.

Consistency matters.

And that creates an obvious problem when you're considering a new product:

“WHAT IF IT'S JUST NOT FOR ME?”

That's fair.

Different hair types.

Different scalp types.

Different routines.

Different individual experiences.

That's why eligible Crowned purchases are protected by a:

90-DAY MONEY-BACK GUARANTEE.

Use Crowned according to the directions.

Give the routine a fair shot.

Then decide whether you want to keep it as part of your scalp-care regimen.

If it isn't right for you, contact customer support within the guarantee period according to the current refund-policy terms.

90 DAYS.

YOUR ROUTINE.

YOUR DECISION.

[TRY CROWNED WITH CONFIDENCE →]

Free U.S. Shipping • Secure Checkout • No Subscription Required

BUT THERE'S A BIGGER IDEA HERE...

**WE SPEND A LOT OF MONEY CARING
FOR HAIR THAT HAS ALREADY LEFT
THE SCALP.**

Think about it.

Hair masks.

Conditioners.

Oils.

Heat protectants.

Leave-ins.

Styling products.

All useful.

But they're primarily dealing with the hair that's already visible.

Crowned adds another perspective:

DON'T IGNORE THE FOUNDATION.

This isn't an argument for throwing away everything else in your bathroom.

It's the opposite.

Keep the products you already like.

Keep your shampoo.

Keep your conditioner.

Keep your styling routine.

JUST ADD THE STEP MOST PEOPLE OVERLOOK.

Direct scalp care.

SCALP FIRST.

STRANDS SECOND.

ROUTINE SIMPLE.

[START MY SCALP-FIRST ROUTINE →]

THE “SKINIFICATION” OF HAIR CARE

WHY THIS CATEGORY IS GETTING MORE SOPHISTICATED

Beauty consumers have changed.

People no longer just ask:

“What does this product promise?”

They ask:

“What's actually inside it?”

That's why ingredient literacy transformed skincare.

Consumers learned to recognize:

Niacinamide.

Peptides.

Ceramides.

Retinoids.

Acids.

Antioxidants.

And now hair care is following a similar trajectory.

The scalp isn't being treated as an afterthought anymore.

It's increasingly becoming its own category.

SCALP SERUMS.

SCALP EXFOLIATION.

BARRIER-FOCUSED CARE.

PEPTIDES.

LIGHTWEIGHT LEAVE-IN FORMULAS.

Crowned belongs to this newer generation of hair care.

Not because it makes some impossible overnight promise.

But because the formula itself reflects a more sophisticated philosophy.

TREAT THE SCALP LIKE SKIN.

[DISCOVER CROWNED →]

THE HONEST COMPARISON

WHICH SOUNDS LIKE A MORE TARGETED ROUTINE?

TRADITIONAL HAIR-ONLY ROUTINE

Shampoo

Conditioner

Mask

Oil

Styling products

Most products focused primarily on the visible hair fiber

Scalp often gets little targeted leave-in care

THE CROWNED APPROACH

Direct-to-scalp application

Copper Tripeptide-1 (GHK-Cu)

Niacinamide

Panthenol

Biotin

Lightweight leave-in serum

Once-daily use

No rinse

Designed to complement your existing routine

90-Day Guarantee

DON'T REPLACE YOUR ROUTINE.

UPGRADE ITS FOUNDATION.

[CHOOSE MY CROWNED BUNDLE →]

“CAN'T I JUST USE HAIR OIL?”

ABSOLUTELY.

Hair oils can be useful.

They are commonly used to add shine, condition the hair fiber and help manage the feel of dry hair.

But that's not exactly what Crowned is designed to be.

Crowned is a:

DIRECT-TO-SCALP PEPTIDE SERUM.

Its lightweight format is built around targeted scalp application.

So the question isn't really:

“OIL OR CROWNED?”

It's:

“WHAT JOB AM I TRYING TO DO?”

Want shine and conditioning primarily through the lengths and ends?

An oil may make perfect sense.

Want to add a targeted peptide + vitamin scalp-care step?

That's where Crowned fits.

DIFFERENT PRODUCT.

DIFFERENT ROLE.

“CAN'T I JUST USE BIOTIN?”

You can find biotin everywhere.

Shampoos.

Conditioners.

Serums.

Supplements.

That's precisely why **biotin alone isn't the Crowned story.**

Crowned combines:

COPPER TRIPEPTIDE-1

NIACINAMIDE

PANTHENOL

BIOTIN

The differentiation comes from the architecture of the formula and its scalp-first delivery.

Not from pretending biotin is a magic ingredient.

**CROWNED ISN'T A BIOTIN SERUM WITH
A FANCY LABEL.**

IT'S A PEPTIDE-BASED SCALP FORMULA.

“WHAT EXACTLY ARE COPPER PEPTIDES?”

THIS IS WHERE THINGS GET INTERESTING.

Peptides are short chains of amino acids.

GHK is a naturally occurring tripeptide that can bind copper, forming the complex commonly referred to as **GHK-Cu**.

Copper peptides have received substantial attention in cosmetic research, particularly around skin biology and remodeling processes.

Research has also explored copper-binding peptides in relation to hair-follicle biology.

But here's the important distinction:

RESEARCH INTEREST ≠ GUARANTEED PRODUCT RESULT.

The presence of GHK-Cu in Crowned does not automatically mean:

“Clinically proven hair regrowth.”

“Dormant follicles reactivated.”

“Bald spots reversed.”

Those are very different claims.

What it does mean is that Crowned uses an ingredient associated with a significantly more sophisticated cosmetic-science story than a conventional hair oil.

And that's exactly why GHK-Cu is the hero ingredient.

ADVANCED COSMETIC PEPTIDE.

SIMPLE DAILY SCALP CARE.

“DOES CROWNED REGROW HAIR?”

THAT'S NOT HOW WE POSITION IT.

Crowned is a cosmetic scalp-care product.

It is designed around:

A HEALTHIER-LOOKING SCALP

STRONGER-LOOKING HAIR

FULLER-LOOKING HAIR

LESS VISIBLE BREAKAGE

It is not positioned as a drug treatment for androgenetic alopecia, alopecia areata or another medical cause of hair loss.

Hair loss can involve genetics, hormones, nutrition, medication, stress, illness and multiple other factors.

Sudden, patchy, significant or unexplained hair loss should be evaluated by a qualified healthcare professional.

CROWNED DOESN'T NEED A MIRACLE CLAIM.

The product has a strong enough cosmetic story without one.

“WHAT DOES FULLER-LOOKING HAIR ACTUALLY MEAN?”

It means exactly what it says:

APPEARANCE.

Hair can look different depending on strand condition, breakage, styling, texture and overall scalp and hair care.

Crowned is designed to support the **cosmetic appearance** of stronger, healthier and fuller-looking hair as part of a consistent routine.

That is different from claiming that Crowned creates a specific number of new follicles or medically reverses hair loss.

And that distinction matters.

THE REAL DIFFERENCE MAY BE SIMPLER THAN THE INGREDIENT LIST

CROWNED MAKES SCALP CARE EASY ENOUGH TO ACTUALLY DO.

Imagine two routines.

ROUTINE A

Special shampoo.

Special conditioner.

Oil.

Mask.

Multiple scalp products.

Different application schedules.

Products that need rinsing.

Products you only use on wash days.

ROUTINE B

Keep what you're already using.

Add Crowned once daily.

Apply.

Massage.

Go.

Which one sounds easier to maintain?

Exactly.

YOU DON'T NEED ANOTHER “SYSTEM.”

YOU NEED ONE GOOD STEP.

[ADD CROWNED TO MY ROUTINE →]

**WHAT CUSTOMERS VALUE ABOUT
CROWNED**

REAL PEOPLE. REAL ROUTINES.

[INSERT ONLY AUTHENTIC VERIFIED CROWNED REVIEWS HERE]

Prioritize genuine testimonials around:

Lightweight texture.

Ease of application.

Non-greasy feel.

Scalp feel.

Easy daily use.

Hair feeling conditioned.

Appearance and styling satisfaction.

Ingredient interest.

Consistency.

★★★★★

“FINALLY, SOMETHING THAT DOESN'T FEEL LIKE HAIR OIL.”

“I've tried scalp oils before and didn't like how heavy my roots felt. Crowned fits much better into my routine.”

Verified Buyer

★★★★★

“THE COPPER PEPTIDE IS WHAT GOT MY ATTENTION.”

“I was already familiar with peptides from skincare, so seeing GHK-Cu in a scalp serum was interesting to me.”

Verified Buyer

★★★★★

“ONE QUICK STEP.”

“I don't want a complicated hair system. I apply Crowned, massage it in and continue with my day.”

Verified Buyer

★★★★★

“EASY TO USE CONSISTENTLY.”

“The lightweight texture is probably my favorite part. It doesn't make me feel like I need to schedule my hair around using it.”

Verified Buyer

Individual experiences may vary.

DEVELOPMENT NOTE: Publish only authentic, substantiated testimonials. Never rewrite reviews to create claims such as “my bald spot disappeared,” “grew X inches,” “stopped shedding,” “regrew my hairline,” “reversed hair loss” or “reactivated dormant follicles.”

BEFORE BUYING ANY SCALP SERUM, ASK THESE 7 QUESTIONS

Marketing in the hair category can get aggressive very quickly.

So before choosing Crowned — or anything else — look past the headline.

1. IS IT ACTUALLY DESIGNED FOR THE SCALP?

Crowned is.

Direct application is central to the routine.

2. DOES THE FORMULA HAVE A CLEAR HERO INGREDIENT?

Yes.

Copper Tripeptide-1 (GHK-Cu).

3. DOES IT INCLUDE COMPLEMENTARY COSMETIC INGREDIENTS?

Yes.

Niacinamide.

Panthenol.

Biotin.

Plus the complete formula shown on the product label.

4. WILL IT REQUIRE REPLACING THE REST OF YOUR HAIR ROUTINE?

No.

Crowned is designed to complement it.

5. IS IT A HEAVY OIL?

No.

Crowned is designed as a lightweight leave-in scalp serum.

6. IS THE ROUTINE REALISTIC?

One daily application.

Apply.

Massage.

Leave in.

7. IS THERE A GUARANTEE?

Eligible purchases are protected by a:

90-DAY MONEY-BACK GUARANTEE.

Those seven answers tell you a lot more about a scalp product than a dramatic before-and-after ever could.

[SEE TODAY'S CROWNED OFFER →]

THERE'S ALSO SOMETHING CROWNED DOESN'T DO...

IT DOESN'T ASK YOU TO BELIEVE YOUR HAIR WILL CHANGE OVERNIGHT.

Hair care is a consistency category.

And dramatic overnight promises should make anyone skeptical.

Crowned takes a more realistic approach.

Use it consistently.

Take care of your scalp.

Reduce unnecessary damage to your hair.

Maintain the rest of your hair-care routine.

Give the process time.

NO “OVERNIGHT REGROWTH.”

NO “7-DAY BALD-SPOT REVERSAL.”

NO MAGIC FOLLICLE STORY.

Just a focused scalp-care formula designed to earn a place in a consistent routine.

BETTER ROUTINES DON'T NEED MIRACLE CLAIMS.

WHY ONCE-DAILY CARE MATTERS COMMERCIALLY — AND PRACTICALLY

There's a simple truth behind nearly every beauty product:

THE PRODUCT YOU DON'T USE CAN'T BECOME PART OF YOUR ROUTINE.

That's why convenience matters.

Crowned doesn't require:

A 30-minute treatment.

A special wash day.

Mixing ingredients.

Multiple products.

A complicated weekly schedule.

It's designed around:

ONE APPLICATION.

ONCE A DAY.

NO RINSE.

That reduces friction.

And less friction makes consistency easier.

APPLY. MASSAGE. GO.

[START MY CROWNED ROUTINE →]

THE BOTTOM LINE

**YOUR HAIR ROUTINE HAS A
FOUNDATION.**

CROWNED STARTS THERE.

You can keep chasing the next shampoo.

The next conditioner.

The next oil.

The next mask.

Or you can add something most traditional routines overlook:

A FOCUSED DAILY SCALP SERUM.

Crowned combines:

COPPER TRIPEPTIDE-1

Advanced peptide scalp care.

NIACINAMIDE

Scalp-barrier-focused cosmetic care.

PANTHENOL

Moisture and strand conditioning.

BIOTIN

A familiar hair-care ingredient.

All inside one lightweight formula designed for direct scalp application.

NO HEAVY OIL.

NO RINSE.

NO COMPLICATED SYSTEM.

ONCE-DAILY APPLICATION.

90-DAY GUARANTEE.

SCALP FIRST.

ROUTINE SIMPLE.

FREQUENTLY ASKED QUESTIONS

WHAT EXACTLY IS CROWNED?

Crowned is a lightweight leave-in cosmetic scalp serum featuring Copper Tripeptide-1 (GHK-Cu), Niacinamide, Panthenol, Biotin and complementary cosmetic ingredients.

It is designed to support scalp condition and the appearance of stronger, healthier and fuller-looking hair.

WHAT MAKES CROWNED DIFFERENT FROM A REGULAR HAIR SERUM?

Crowned is specifically designed around **direct scalp application**.

Its hero ingredient is Copper Tripeptide-1 (GHK-Cu), supported by ingredients including Niacinamide, Panthenol and Biotin.

The product is intended to complement the rest of your hair-care routine rather than simply function as a styling serum.

WHAT IS GHK-Cu?

GHK-Cu is a copper-binding tripeptide used in advanced cosmetic formulations and researched in areas involving skin biology, tissue remodeling and hair-follicle biology.

Research on an individual ingredient should not be interpreted as proof that Crowned itself clinically regrows hair.

IS CROWNED MINOXIDIL?

No.

Crowned is a cosmetic scalp-care serum.

It is not minoxidil and is not positioned as a drug treatment for hair loss.

DOES CROWNED TREAT BALDNESS OR ALOPECIA?

No.

Crowned is not intended to diagnose, treat, cure or prevent androgenetic alopecia, alopecia areata or any other medical cause of hair loss.

DOES CROWNED CONTAIN BIOTIN?

Yes.

Biotin is part of Crowned's broader cosmetic formula, alongside Copper Tripeptide-1, Niacinamide, Panthenol and other ingredients shown on the current product label.

HOW DO I USE CROWNED?

Apply **1 full dropper daily** directly to a dry or towel-dried scalp according to the current product directions.

Massage gently into the desired areas.

Leave it in.

No rinse is required.

DO I NEED TO CHANGE MY SHAMPOO OR CONDITIONER?

No.

Crowned is designed to complement your existing hair-care routine.

WILL IT MAKE MY HAIR GREASY?

Crowned is designed as a lightweight scalp serum rather than a heavy traditional hair oil.

Individual experience can vary depending on hair type, scalp type and amount applied.

WHEN SHOULD I EXPECT TO SEE A DIFFERENCE?

Hair and scalp appearance changes gradually and individual experiences vary.

Age, genetics, hair-care practices, nutrition, hormones and underlying health conditions can all influence hair appearance.

Crowned does not promise a specific cosmetic result within a specific number of days.

CAN WOMEN AND MEN USE CROWNED?

Crowned is a cosmetic scalp-care serum. Follow the current product label regarding intended users and directions.

Anyone experiencing sudden, significant, patchy or unexplained hair loss should seek professional evaluation rather than relying on a cosmetic product.

WHAT IF CROWNED ISN'T RIGHT FOR ME?

Eligible purchases are protected by the 90-Day Money-Back Guarantee according to the current refund-policy terms.

ONE LAST THING...

YOUR SCALP IS SKIN.

You probably wouldn't build a skincare routine that stopped at cleanser.

So why should scalp care always stop at shampoo?

Crowned makes adding a targeted serum surprisingly simple.

COPPER TRIPEPTIDE-1.

NIACINAMIDE.

PANTHENOL.

BIOTIN.

One lightweight formula.

One daily application.

No complicated system.
