7 Reasons More People Are Rethinking Their Nighttime Routine — And Looking Beyond “Just More Melatonin”

Sonnus combines 10 nighttime-support ingredients with just 0.9 mg of melatonin in two Wild Berry gummies — creating a simpler way to make winding down part of the night.

For years, the sleep-support aisle has followed a surprisingly simple formula:

Put melatonin in a bottle.

Increase the number on the front.

Call it a nighttime solution.

3 mg.

5 mg.

10 mg.

Sometimes even more.

And while melatonin plays an important role in normal sleep-wake timing, there's an obvious question more people are starting to ask:

SHOULD AN ENTIRE NIGHTTIME ROUTINE REALLY REVOLVE AROUND ONE INGREDIENT?

Because the transition from a busy day into rest involves more than simply looking at the clock.

There's the mental pace of the evening.

Screen exposure.

Late work.

Stress.

Caffeine.

Environment.

Routine.

And the habits that tell your body:

THE DAY IS OVER.

That's where **Sonnus®** takes a different approach.

Instead of building the entire formula around melatonin alone, Sonnus combines **10 nighttime-support ingredients** into two convenient Wild Berry gummies.

Including:

Magnesium

L-Theanine

GABA

5-HTP

Apigenin

Lemon Balm

Vitamin B6

Vitamin B2

and **0.9 mg of melatonin** as one part of the broader formula.

Ten ingredients.

Two gummies.

One easy nightly ritual.

Here are **7 reasons** people looking for a more complete nighttime routine are taking a closer look at Sonnus.

REASON #1

01. YOUR NIGHT STARTS BEFORE YOUR HEAD HITS THE PILLOW

One of the biggest mistakes people make with nighttime routines is thinking sleep begins the moment they get into bed.

It doesn't.

The transition starts earlier.

Your environment starts changing.

Light changes.

Activity slows down.

Stimulation drops.

The workday ends.

Or at least...

IT'S SUPPOSED TO.

Modern life doesn't always cooperate.

Messages keep coming.

Screens stay bright.

Work stretches into the evening.

Your mind may still be processing everything that happened during the day.

That's why a better nighttime routine isn't just about what happens **after** you close your eyes.

It's also about creating a clear transition from:

ON → OFF

BUSY → QUIET

DAY → NIGHT

Sonnus was built around that transition.

Two gummies become a simple ritual you can pair with the habits that already support a better nighttime environment.

Dim the lights.

Reduce stimulation.

Put the work away.

Take Sonnus according to the product directions.

Give your night a clear beginning.

CHEW. UNWIND. REST.

[START MY NIGHTLY ROUTINE →]

REASON #2

02. SONNUS DOESN'T BUILD THE ENTIRE FORMULA AROUND MELATONIN

Melatonin matters.

It is a hormone naturally produced by the body and involved in normal sleep-wake timing.

But Sonnus uses a different formula philosophy:

MELATONIN IS PART OF THE NIGHTTIME STORY.

NOT THE ENTIRE STORY.

Sonnus contains just **0.9 mg of melatonin per serving** as part of a broader 10-ingredient blend.

Instead of relying on a single ingredient, the formula includes nutrients, amino acids and botanical compounds selected around nighttime wellness.

The result is not:

“Here's more melatonin.”

It's:

HERE'S A MORE COMPLETE NIGHTTIME FORMULA.

That distinction is one of the biggest reasons Sonnus stands apart from basic melatonin-only gummies.

[SEE WHAT'S INSIDE SONNUS →]

REASON #3

03. TEN NIGHTTIME-SUPPORT INGREDIENTS. NOT TEN SEPARATE BOTTLES.

Imagine trying to build the Sonnus formula one product at a time.

A bottle of magnesium.

Another of L-Theanine.

Another of GABA.

Another of 5-HTP.

Apigenin.

Lemon Balm.

B vitamins.

Melatonin.

Suddenly your “simple bedtime routine” has become another supplement stack.

More bottles.

More labels.

More decisions.

More things to remember.

Sonnus removes that friction.

10 INGREDIENTS.

2 GUMMIES.

DONE.

That's one of the strongest parts of the product.

It's not just what's inside.

It's how much complexity the formula removes from the routine.

Because the best nighttime supplement stack isn't necessarily the one with the most bottles.

IT'S THE ONE YOU CAN ACTUALLY STICK WITH.

[TRY THE SIMPLER NIGHTTIME ROUTINE →]

REASON #4

04. THE FORMULA IS BUILT AROUND MULTIPLE PARTS OF NIGHTTIME WELLNESS

Sonnus isn't trying to convince you that one ingredient is magic.

Its story is the **combination**.

Here is what makes the formula interesting.

MAGNESIUM

THE MINERAL FOUNDATION

Magnesium is an essential mineral involved in hundreds of physiological processes, including normal nervous-system and muscle function.

It is also one of the most familiar ingredients used in modern nighttime-wellness formulations.

WHY IT'S HERE

To form part of Sonnus' broader relaxation and nighttime-support profile.

L-THEANINE

A WELL-STUDIED AMINO ACID ASSOCIATED WITH RELAXATION

L-Theanine occurs naturally in tea leaves and has attracted considerable research interest around relaxation, stress response and sleep-related outcomes.

Recent systematic reviews have found potential benefits in some subjective sleep measures, although dose and study design vary.

WHY IT'S HERE

To complement Sonnus' nighttime-calming approach.

GABA

PART OF THE BODY'S INHIBITORY SIGNALING SYSTEM

GABA is a naturally occurring neurotransmitter involved in inhibitory signaling throughout the nervous system.

WHY IT'S HERE

As one component of Sonnus' broader relaxation-oriented formula.

5-HTP

PART OF A NORMAL NEUROTRANSMITTER PATHWAY

5-HTP is a precursor involved in normal serotonin metabolism.

WHY IT'S HERE

To complement the formula's multi-ingredient nighttime architecture.

APIGENIN

A PLANT COMPOUND NATURALLY FOUND IN CHAMOMILE

Apigenin is a naturally occurring flavonoid found in chamomile and other plants.

Chamomile has long been associated culturally with evening routines and nighttime preparations.

WHY IT'S HERE

To add a botanical dimension to the nighttime formula.

LEMON BALM

A CLASSIC EVENING BOTANICAL

Lemon Balm has a long history of traditional use in calming herbal preparations.

WHY IT'S HERE

To complement Sonnus' relaxation-focused ingredient profile.

VITAMIN B6

PART OF NORMAL NEUROTRANSMITTER METABOLISM

Vitamin B6 functions as a cofactor across multiple biochemical pathways.

WHY IT'S HERE

To complement the nutritional architecture of the nighttime formula.

VITAMIN B2

SUPPORTING NORMAL CELLULAR METABOLISM

Vitamin B2 plays a recognized role in normal cellular energy metabolism.

WHY IT'S HERE

To broaden the formula's nutritional foundation.

MELATONIN — 0.9 MG

THE NIGHTTIME SIGNAL

Melatonin is naturally involved in normal sleep-wake timing.

Sonnus uses **0.9 mg per serving** rather than building the entire formula around a large melatonin number.

WHY IT'S HERE

As one part of a broader nighttime-support strategy.

THE IMPORTANT PART?

No ingredient has to carry the whole formula.

TEN INGREDIENTS.

ONE COHERENT NIGHTTIME ROUTINE.

[VIEW THE SONNUS FORMULA →]

REASON #5

05. IT CHALLENGES THE “MORE MELATONIN MUST BE BETTER” MINDSET

Spend five minutes shopping for sleep gummies and you'll notice something.

A lot of products compete using one number:

MELATONIN MG.

Higher.

Higher.

Higher.

But dose size isn't the same thing as product completeness.

Sonnus approaches the category from a different direction.

Instead of asking:

“How much melatonin can we fit into this gummy?”

The formula is built around:

“How can we create a broader nighttime ritual using multiple complementary ingredients?”

That's why Sonnus contains:

0.9 MG MELATONIN

combined with:

Magnesium.

L-Theanine.

GABA.

5-HTP.

Apigenin.

Lemon Balm.

and other formula components.

MORE INGREDIENT STRATEGY.

LESS DEPENDENCE ON ONE NUMBER.

That's a much more interesting product story than simply increasing the melatonin dose.

[TRY THE SONNUS DIFFERENCE →]

REASON #6

06. TWO GUMMIES MAKE THE ROUTINE ALMOST IMPOSSIBLE TO OVERCOMPLICATE

There is another problem with nighttime routines.

People turn them into projects.

Special teas.

Multiple capsules.

Powders.

Apps.

Breathing protocols.

Trackers.

Five different supplements.

A complicated sleep routine can become one more thing to stress about.

Sonnus is intentionally simpler.

Take **two gummies approximately 30 minutes before bedtime**, according to the current product directions.

Then do the obvious things that support a better nighttime environment.

Lower the lights.

Reduce unnecessary screen stimulation.

Stop working.

Let the room cool down.

Give yourself permission to end the day.

That's it.

SONNUS DOESN'T NEED TO BECOME THE ENTIRE NIGHT.

It just needs to become one consistent part of it.

TWO GUMMIES.

THIRTY SECONDS.

ONE CLEAR BEDTIME SIGNAL.

[MAKE SONNUS PART OF MY NIGHT →]

REASON #7

07. YOU GET 90 DAYS TO DECIDE WHETHER IT DESERVES A PLACE ON YOUR NIGHTSTAND

Trying a nighttime supplement always comes with uncertainty.

Will I like the format?

Will I use it consistently?

Will it fit my routine?

Fair questions.

That's why eligible Sonnus purchases are covered by a:

90-DAY MONEY-BACK GUARANTEE.

That gives you time to use Sonnus according to the directions and decide whether the routine makes sense for you.

No responsible supplement company can guarantee the exact same experience for every person.

Sleep is influenced by dozens of variables.

What Sonnus can do is remove much of the purchasing risk.

TRY IT.

BUILD THE ROUTINE.

DECIDE FOR YOURSELF.

90 DAYS.

YOUR DECISION.

**THERE'S ONE MORE REASON THE
SONNUS APPROACH MAKES SENSE...**

**A GOOD NIGHTTIME ROUTINE SHOULD
HELP YOU SLOW DOWN — NOT GIVE
YOU MORE THINGS TO THINK ABOUT.**

Think about how backwards some wellness routines have become.

People reach bedtime already exhausted...

...then open six supplement bottles.

Check three apps.

Review a sleep score.

Set five alarms.

Read another article about sleep.

And somehow relaxing has turned into another performance metric.

Sonnus isn't built around that mentality.

Its philosophy is simpler:

MAKE THE NIGHT EASIER.

Two gummies.

A consistent bedtime.

Less stimulation.

A darker room.

A calmer routine.

Then let the night be the night.

CHEW.

UNWIND.

REST.

[CHOOSE MY SONNUS BUNDLE →]

“CAN'T I JUST BUY MELATONIN?”

ABSOLUTELY.

And if all you want is a basic melatonin supplement, there are plenty of options.

But that isn't the reason Sonnus exists.

Sonnus was created for people who want **more than a melatonin-only formula**.

Instead of building the entire product around one ingredient, Sonnus brings together ten ingredients in one nighttime gummy.

MELATONIN IS ONE COMPONENT.

SONNUS IS THE COMPLETE FORMULA.

That's the distinction.

[TRY A MORE COMPLETE NIGHTTIME ROUTINE →]

“CAN'T I JUST BUY THESE INGREDIENTS SEPARATELY?”

You could.

But then you've recreated the exact problem Sonnus was designed to solve.

Imagine buying:

Magnesium.

L-Theanine.

GABA.

5-HTP.

Apigenin.

Lemon Balm.

Melatonin.

B6.

B2.

And the remaining formula components.

More bottles.

More serving instructions.

More reorders.

More space on the nightstand.

Sonnus simplifies the experience into:

TEN INGREDIENTS.

TWO GUMMIES.

DONE.

Sometimes convenience **is** the differentiator.

“IS SONNUS A SLEEPING PILL?”

NO.

Sonnus is a dietary supplement.

It is not a prescription sleeping medication.

It is not an OTC drug.

And it should not be positioned as a treatment for insomnia or another sleep disorder.

Sonnus is designed to **support relaxation and healthy sleep as part of a consistent nighttime routine.**

If persistent sleep difficulties are affecting daily life, a qualified healthcare professional should evaluate the underlying cause.

“WILL IT KNOCK ME OUT?”

THAT ISN'T THE GOAL.

Sonnus should not be thought of as a sedative designed to “knock someone out.”

The product is built around a more measured idea:

SUPPORT THE TRANSITION INTO A BETTER NIGHTTIME ROUTINE.

That means creating the right conditions for rest and using a multi-ingredient supplement as part of that routine.

The positioning is:

SUPPORT.

Not force.

“WILL I WAKE UP GROGGY?”

Individual experiences vary.

Morning alertness can be influenced by multiple factors including total sleep time, sleep timing, alcohol, medications, underlying health conditions and individual sensitivity.

Sonnus should not be marketed as guaranteeing a “zero-grogginess morning” unless that outcome has been appropriately substantiated for the finished product.

The product's stronger point is simpler:

0.9 MG MELATONIN AS PART OF A BROADER FORMULA.

“WILL SONNUS KEEP ME ASLEEP ALL NIGHT?”

No dietary supplement should be marketed as guaranteeing uninterrupted sleep.

Nighttime waking can occur for many different reasons.

Sonnus is designed to support healthy sleep and relaxation as part of an overall nighttime routine — not to promise a specific number of uninterrupted hours.

WHAT MAKES SONNUS DIFFERENT?

IT HAS A CLEAR FORMULATION PHILOSOPHY.

A lot of products start with a familiar ingredient and then compete by making the number bigger.

Sonnus takes the opposite route.

DON'T ASK ONE INGREDIENT TO DO EVERYTHING.

Instead, combine multiple ingredients selected around complementary aspects of nighttime wellness.

Magnesium.

L-Theanine.

GABA.

5-HTP.

Apigenin.

Lemon Balm.

B vitamins.

Melatonin.

The ingredients don't all do the same thing.

That's precisely the point.

MULTI-INGREDIENT FORMULA.

SINGLE NIGHTTIME ROUTINE.

[SEE THE FULL FORMULA →]

THE NIGHTTIME “SWITCH” ISN'T A MAGIC INGREDIENT

IT'S THE ROUTINE YOU REPEAT.

People love looking for one secret:

The perfect supplement.

The perfect tea.

The perfect pillow.

The perfect sleep hack.

Real life is usually less dramatic.

A better nighttime environment is created by repeated signals.

A consistent schedule.

Lower light.

Reduced stimulation.

A cooler, darker room.

Less late caffeine.

An intentional wind-down period.

Sonnus can become one of those signals.

TAKE TWO GUMMIES.

START WINDING DOWN.

REPEAT THE RITUAL.

Over time, the ritual becomes familiar.

And that's why the product's simplicity matters.

WHAT SCIENCE ACTUALLY SAYS ABOUT SOME OF THESE INGREDIENTS

AND WHY WE DON'T NEED TO EXAGGERATE IT

Take L-Theanine.

Recent systematic reviews and meta-analyses have found signals suggesting potential benefits in certain sleep-related outcomes, including subjective sleep quality and sleep-onset measures.

But there's an important distinction:

A STUDY ON AN INDIVIDUAL INGREDIENT IS NOT A CLINICAL TRIAL ON SONNUS.

Dose matters.

Formulation matters.

Population matters.

Combination matters.

That's why we don't need to tell you:

“Clinically proven to fix your sleep.”

That wouldn't be an appropriate conclusion from ingredient research alone.

The more accurate takeaway is:

SONNUS CONTAINS INGREDIENTS WITH RELEVANT RESEARCH HISTORIES, COMBINED INTO A CONVENIENT NIGHTTIME FORMULA.

And that's a strong enough story without inventing science.

ONE MORE THING...

STOP TRYING TO “WIN” AT SLEEP.

A nighttime routine shouldn't become another thing you need to perform perfectly.

You don't need twenty hacks.

You don't need to obsess over every metric.

You don't need an entire nightstand full of supplements.

Start simpler.

Take Sonnus according to the directions.

Dim the lights.

Put the phone away.

Give yourself a consistent bedtime.

Let the day end.

THAT'S THE IDEA.

A BETTER NIGHTTIME ROUTINE SHOULD FEEL LIKE LESS WORK.

Not more.

FREQUENTLY ASKED QUESTIONS

WHAT EXACTLY IS SONNUS?

Sonnus is a nighttime dietary supplement in Wild Berry gummy form featuring 10 ingredients selected around relaxation, nighttime wellness and healthy sleep support.

HOW DO I TAKE IT?

Take **2 gummies approximately 30 minutes before bedtime**, according to the current product directions.

DOES SONNUS CONTAIN MELATONIN?

Yes.

Sonnus contains **0.9 mg of melatonin per serving** as part of its broader multi-ingredient formula.

WHY DOES SONNUS CONTAIN ONLY 0.9 MG?

Because the formula is not built around melatonin alone.

Melatonin is one component of a 10-ingredient nighttime formula.

The product should not be interpreted as claiming that 0.9 mg is universally “better” than every other dose for every person.

WHAT ELSE IS IN THE FORMULA?

Sonnus includes ingredients such as magnesium, L-Theanine, GABA, 5-HTP, apigenin, lemon balm and B vitamins in addition to melatonin.

Refer to the current Supplement Facts panel for the complete formula and amounts.

IS SONNUS A SLEEPING PILL?

No.

Sonnus is a dietary supplement and is not intended to replace prescription or OTC sleep medication.

DOES SONNUS TREAT INSOMNIA?

No.

Sonnus is not intended to diagnose, treat, cure or prevent insomnia or any other medical condition.

Persistent sleep problems should be discussed with a qualified healthcare professional.

WILL SONNUS PUT ME TO SLEEP IMMEDIATELY?

Individual experiences vary.

Sonnus is designed to support relaxation and restful sleep as part of a consistent nighttime routine rather than guarantee sleep onset within a specific amount of time.

CAN I TAKE SONNUS EVERY NIGHT?

Follow the current product-label directions.

If you have questions about regular melatonin or supplement use based on your medical history, consult a qualified healthcare professional.

CAN I USE SONNUS WITH PRESCRIPTION MEDICATION?

If you take sleep aids, sedatives, antidepressants or other prescription medications — or other products containing melatonin — consult a qualified healthcare professional before using Sonnus.

CAN I DRIVE AFTER TAKING SONNUS?

Sonnus is intended for nighttime use.

Do not drive or operate machinery if you experience drowsiness.

WHAT IF SONNUS ISN'T RIGHT FOR ME?

Eligible purchases are protected by the 90-Day Money-Back Guarantee according to the current refund-policy terms.
